Project Work

- Canva Clone – Online Design Tool | [Github](#)**
Developed a Canva-like design platform using Node.js, Express, MongoDB, and microservices architecture with API Gateway and reverse proxy for service routing. Implemented scalable backend services for asset management, user projects, and real-time collaboration. Ensured smooth service orchestration and modularity using reverse proxy and service isolation.
- Spotify Clone – Full-Stack Music Streaming Platform | [Github](#) | [Link](#)**
Built a feature-rich Spotify clone using microservices architecture with Node.js, Express, MongoDB, PostgreSQL, and Redis for caching. Developed scalable backend services for authentication, music metadata, and user preferences. Designed a responsive React frontend with Tailwind CSS and managed global state using Context API.
- Real-Time Chat Application | [Github](#)**
Developed a responsive real-time chat application using React.js, Node.js, MongoDB, and Socket.IO. Implemented user authentication and WebSocket-based bidirectional communication for live messaging. Crafted a modern, mobile-friendly UI with Tailwind CSS for a seamless user experience.
